

Waterproofing system for facade connections

Effisus Ecofacade is the definite system for waterproofing facades. The system's high performance and added value are guaranteed, not only due to its temperature range resistance, but also to its possibility of full customisation, according to each specific project. Through this, the system's ease and speed of application are increased, the possibility of errors during installation is reduced and waste materials are minimized.

The system protects buildings' facade connections, and consequently its entire inner-shell, from the action of atmospheric agents and their consequences. It ensures both water and air tightness, whilst also maximizing energy efficiency and acoustics.

Effisus Ecofacade

Effisus Ecofacade:

- Fully customisable widths
- Expectable durability of 50 years
- Resistant to UVs and ozone
- Service temperatures from -30°C e +140°C
- Permanently elastic
- Possibility of integrated self-adhesive bands or fast connect gaskets for no need of extra accessories
- Elongation of up to 300%
- Both thermal and structural vibration resistance
- Possibility of last-minute orders

Typical Applications:

- Connections in ventilated facades
- Connections in curtain walls
- Connections in traditional facades
- Connections in pre-fabricated facades
- Sustainable Construction Projects

SOLUTION BENEFITS

- Robust – 100% waterproof and UV resistant
- Universal – Customisable dimensions
- Durable – High life-expectancy
- Flexible – Option for integrated self-adhesive bands and/or fast-connect gaskets
- Easy to apply – Simple to handle materials and no need for accessories

SUPPLY INFORMATION

- Effisus Ecofacade – 20m rolls with widths between 10mm and 1320mm. Other dimensions available upon request.
