

# Leaks Sealing Solution

The Self-Adhesive Effisus Easyrepair Membrane is the ideal solution to seal leaks on virtually all roofs and facades. It creates a waterproof, moisture, and air tight barrier with no additional sealing required.

## ACTIVE SEALANTS TECHNOLOGY

The Effisus Easyrepair Membrane uses an innovative technology with active sealants. This technology uses sealants that don't have double connections between their carbon atoms, which results in an extremely stable molecular structure, that is resistant to light, ozone and heat.

Through the encapsulation of a special primer, an adhesive that "melts" with the surface where it is applied, is obtained. This originates an instant bonding, to most known materials used in construction. It can be applied in environments with temperatures from -56°C up to +93°C.

# Effisus Easyrepair

## Effisus Easyrepair Membranes:

- Exceptional adhesiveness on the most different materials
- Permanent sealing of any joint or leakage point
- One-step installation, with no need for accessories

## Effisus Easyrepair Variants:

- Easyrepair White
- Easyrepair Grey
- Easyrepair Tan
- Easyrepair Black
- Easyrepair Copper
- Easyrepair Alumen
- Easyrepair Paint
- Easyrepair +

## Excellent Adhesiveness into the Following Materials:

Polycarbonate

Glass

Metal

Natural stone

Concrete

Plaster

Ceramic

## SOLUTION ADVANTAGES

- Resistant – Waterproof, UV stable and flexible up to -56°C.
- Universal – Compatible with the different materials on site.
- Long-lasting – Over 20 years of service life expectancy.
- Flexible – Complies with the different installation requirements.
- Easy to install – Easy to handle materials and no need for accessories.

## INFORMATION FOR SUPPLYING

- Effisus Easyrepair Membranes – Rolls with 15.2m length and 50 to 1000mm width.
