

Penetration sealing solution for roofs and facades

Effisus Stopper is an innovative solution for sealing penetrations of any size or configuration, on flat roofs. Effisus Stopper works on the most common roofing materials, such as: asphaltic membranes, PVC, TPO, EPDM or metal. Application on sloped roofs or facades is also possible.

It is an extremely versatile solution, with precast moulds and innovative sealants, and a quick and easy installation. There is no need for mechanical fastening and it is suitable for any penetration configuration.

Effisus Stopper – The solution for the no. 1 cause of roof leaks.

Effisus Stopper

Effisus Stopper:

- Pre-fabricated moulds that can be used to achieve any dimension or configuration
- Pourable, self-levelling and structural sealants with high resistance to UV light, permanently flexible and without solvents

Typical applications:

- HVAC penetrations
- Solar pannels
- Equipment support structures
- Guards
- Electric cables
- Antennas
- Sloped roof
- Vertical walls
- Ducts with temperatures up to 204°C

Easy and quick to install!
Any dimension or configuration.

SOLUTION BENEFITS

- Easy to install – installation in under 15 minutes.
- Resistant – waterproof, UV and ozone stable, resistant to ice and standing water.
- Universal – compatible with all membranes and materials (TPO, PVC, EPDM, Bitumen, Concrete).
- Flexible design – adaptable to any size or configuration.
- Economic – at a fraction of the cost of any traditional solution.

SUPPLY INFORMATION

- Complete installation kits. Please contact Up-Way Systems for additional information.
- Effisus Stopper SAS HT Sealant (1)
- Effisus Stopper 1-P Sealant (2)
- Effisus Stopper EC Curb
