

## Facade connections waterproofing system with self-adhesive bands

Effisus Ecofacade SA-Edge is the innovative time-saving system for waterproofing facade connections. The system's high performance and added value are guaranteed, not only due to its expectable durability of over 50 years, but even more to its self-adhesive bands, which can be of any number and configuration, according to each project's needs. Through the extinction of the need for adhesive pastes, applications' ease and speed are increased, wastes are eliminated and budget predictability is more effective. Possibility of human error during installation is also widely reduced.

The system protects buildings' facades at their weakest points – connections. It protects them from the degrading action of atmospheric agents, such as oxidation and mould. This is done by ensuring both water and air tightness, which also improves energy efficiency and acoustics.

# Effisus Ecofacade SA-Edge

### Effisus Ecofacade SA-Edge:

- Fully customisable widths
- Expectable durability of 50 years
- Resistant to UVs and ozone
- Service temperatures from -30°C e +140°C
- Permanently elastic
- Elongation of up to 300%
- Both thermal and structural vibration resistance
- Possibility of having multiple self-adhesive bands and custom positions
- Possibility of last-minute orders

### Typical Applications:

- Connections in ventilated facades
- Connections in curtain walls
- Connections in traditional facades
- Connections in pre-fabricated facades
- Sustainable Construction Projects

**Unlimited self-  
adhesive bands.  
Waste-free!**

### SOLUTION BENEFITS

- Robust – 100% waterproof and UV resistant
- Universal – Customisable dimensions
- Durable – High life-expectancy
- Flexible – Customisable integrated self-adhesive bands
- Easy to apply – Simple to handle materials and no need for accessories

### SUPPLY INFORMATION

- Effisus Ecofacade SA-Edge – 20m rolls with widths between 10mm and 1320mm. Other dimensions available upon request.
