

## Impregnated self-expanding joint-sealing tape

The Effisus SealExpand XTRA tape is the efficient solution for sealing joints and perimeters, in new buildings or rehabilitation works. The tape's properties concede it an excellent expandability and permanent elasticity, which enable it to absorb movements during the different phases of a building's lifecycle. Moreover, the tape is resistant to UV radiation and rainwater with pressures up to 1000Pa. All this, without the need for additional coatings or sealants.

Effisus SealExpand XTRA's added value is due its thermal and acoustic insulation properties, which not only increase energy efficiency, but also improve the quality of buildings' indoor spaces.

# Effisus SealExpand XTRA

### Effisus SealExpand XTRA Tape:

- Increased ageing resistance
- Service temperatures from -30°C e +90°C
- Standard widths from 10mm to 50mm
- Thermal and structural vibration-proof
- Adapts do any unevenness inside the joint
- B1 Flammability Rating
- Paint coating and sealant compatible
- Solvent-free, no hazardous materials
- Variants from 300Pa to 1000Pa
- Possible last-minute orders

### Typical Applications:

- Prefabricated construction in concrete or other materials
- Sealing perimeters of frames (windows/doors)
- Skylights
- Cladding Panels
- Curtain Walls

### SOLUTION BENEFITS

- Robust – 100% waterproof and UV resistant
- Universal – Variants for different needs
- Durable – High life-expectancy
- Flexible – Adapts to on-site demands
- Easy to apply – Simple to handle and no need for accessories

### SUPPLY INFORMATION

- Effisus Sealexpend XTRA – Packaging depends on the chosen solution's dimensions. Contact Up-Way Systems.
