

Pre-fabricated frames for window waterproofing

Effisus Ecofacade Pre-Fab Frames are the outperforming system for a seamless facade-to-window connection sealing job. Due to their edges and shapes, sealing window frames has always required a large amount of time, wastes and sealants, but not anymore. Since the frames are customised and pre-fabricated according to each windows, using the Ecofacade Membrane, a time-saving, error-free, long-lasting installation is assured.

With Effisus Ecofacade Pre-Fab Frames, waterproofing windows becomes an efficient and sustainable job. Not only is time saved, but also, the probability of installation errors is eliminated, needed labour is reduced and performance is assured, more than ever.

Effisus Ecofacade Pre-fab Frames

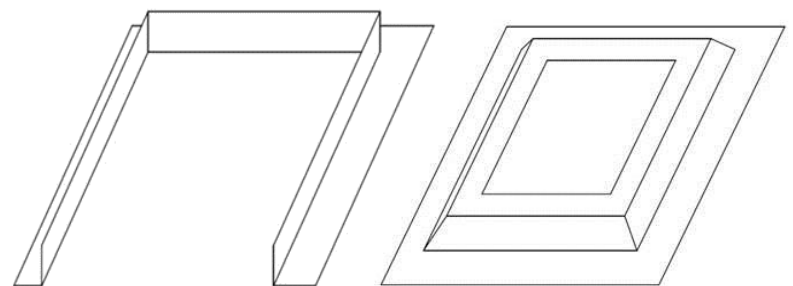

Effisus Ecofacade Pre-fab Frames:

- Fully customisable dimensions and configurations
- Expectable durability of 50 years
- Resistant to UVs and ozone
- Service temperatures from -30°C e +140°C
- Permanently elastic
- Elongation of up to 300%
- Both thermal and structural vibration resistance
- In-factory pre-fabrication and vulcanisation

Typical Applications:

- Connections in ventilated facades
- Connections in curtain walls
- Connections in traditional facades
- Connections in pre-fabricated facades
- Sustainable construction projects

1. U-Sleeve

2. Closed Sleeve

SOLUTION BENEFITS

- Robust – 100% waterproof and UV resistant
- Universal – Customisable dimensions and configurations
- Durable – High life-expectancy
- Flexible – Absorbs thermal dilation/contraction and structural movements
- Easy to apply – Simple to handle materials and no need for accessories
