

Structural glazing and window weatherproofing engineered profiles

Engineered, customized and pre-fabricated profiles according to specifically fit into each window aluminum profile. These are customized to fit any frame, thus providing an unprecedented speed and ease of application, in junction with unrivalled protection and durability.

Effisus Ecofacade Pre-Fab Profiles are the outperforming system for a seamless facade-to-window connection sealing job.

With Effisus Ecofacade Pre-Fab profiles, waterproofing window frames and any other façade connections becomes an efficient and sustainable job. Not only is time saved, but also, the probability of installation errors is eliminated, needed labor is reduced and performance is assured, more than ever.

Effisus Ecofacade Pre-fab Profiles

Effisus Ecofacade Pre-fab Frames:

- Fully customizable dimensions and configurations
- In-factory pre-fabrication and vulcanization
- Complete and integrated System
- Expectable durability of 50 years
- Resistant to UVs and ozone
- Permanently elastic
- Inspection-friendly
- Reduction of wastes by customizing solutions
- Reduction of wastes due to absence of adhesives
- Both thermal and structural vibration resistance

**100% productivity
100% customization!**

Typical Applications:

- Connections in ventilated facades
- Connections in curtain walls
- Connections in traditional facades
- Connections in pre-fabricated facades

SOLUTION BENEFITS

- Robust – 100% waterproof and UV resistant
- Universal – Customizable dimensions and configurations
- Durable – High life-expectancy
- Flexible – Absorbs thermal dilation/contraction and structural movements
- Easy to apply – Simple to handle materials and no need for accessories
