

## Effisus VapX Membrane

**Effisus VapX Membrane is a one-ply vapour control layer (VCL) for roofs, facades, dry and general construction indoors in order to build an airtight barrier for the protection of construction according with DIN 4108.**

The carefully selected raw material assures superior ageing resistance, dimensional stability, length and crosswise as well as high rip resistance. The sd value of 100m effectively prevents the building of condensate in the areas of insulated construction.

# Effisus VapX Membrane

### Effisus VapX Membrane:

- Vapor tight (Sd=100m)
- Windtight
- Lightweight
- Flexible
- Superior ageing resistance
- Effisus Ecofacade System component

### Typical applications:

- Effisus Ecofacade Envelope System
- Roofs
- Wood construction
- Metal construction
- Curtain walls
- Rainscreen cladding

### SOLUTION ADVANTAGES

- Resistant – Resistant to movement, thermal variations and contact with moisture.
- Universal – Complies with the different project requirements.
- Complete system – Complete range of accessories for any project need.
- Easy to install – Lightweight and flexible. No need for special tools.

### COMPLEMENTARY INFORMATION

- Standard dimensions: 4 x 25m. Other dimensions available upon request.
- Component of the Effisus Ecofacade Envelope System - Air tightness and water vapor management facade integrated system
- Accessories: Effisus Adjoin GS Tape, Effisus 2Bond GO Tape, Effisus 2Bond DS Tape, Effisus Tight Rings
