

Effisus Bonding KF Adhesive

Effisus Bonding KF Adhesive is a building bonding paste for bonding Effisus Ecofacade Membranes to all conventional building surfaces, such as concrete or metal. With exceptional bonding strength it is especially suitable for rough, uneven surfaces.

With the Effisus Bonding KF Adhesive sealing can be carried out at temperatures down to -10°C and up to $+35^{\circ}\text{C}$, even on moist (absorbent) surfaces*, allowing corrections on the membrane position. It resists to temperatures from -40°C to $+90^{\circ}\text{C}$, remaining permanently flexible. Waterproofing, it does not require additional sealants.

Effisus Bonding KF

Effisus Bonding KF Adhesive:

- Exceptional bonding strength
- No additional mechanical fixing required
- Waterproofing
- Suitable for rough, uneven surfaces
- Superb ageing resistance
- Service temperature of -40°C to $+90^{\circ}\text{C}$

Waterproof!
Approved from -40°C
to $+90^{\circ}\text{C}$!

Typical applications:

- Bonding to concrete
- Bonding to metal
- Bonding operations with low temperatures
- Bonding on moist surfaces
- Bonding of Effisus Ecofacade Membranes overlapping joints

SOLUTION ADVANTAGES

- Powerful – Exceptional bonding strength with no additional mechanical fixing required.
- Resistant – Resistant to movements, thermal variations and contact with moisture.
- Universal – Compatible to all conventional building surfaces (concrete, aluminium, PVC, wood, etc.).
- Flexible – Complies with the different installation requirements.
- Easy to install – With adhesive gun or spatula. Membranes can be applied up to 30 minutes after adhesive.
- Approved – Approved accessory of the Effisus Ecofacade System.

SUPPLY INFORMATION

- 600ml foil pouch -12 units / carton

* In combination with Effisus Coat NP Primer
