

Effisus Bonding KF+P Adhesive

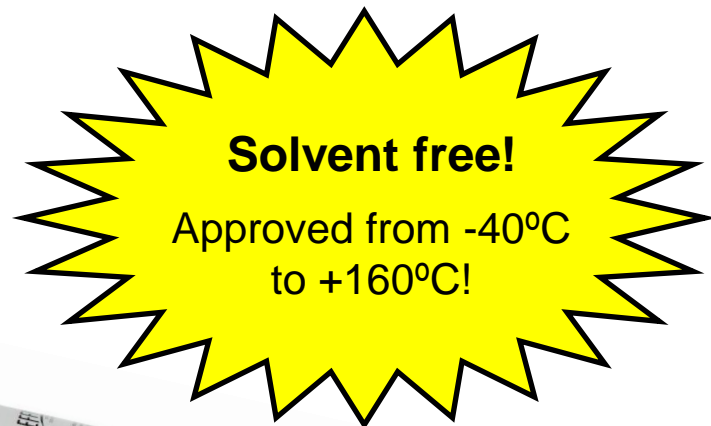

Effisus Bonding KF+P Adhesive is a building bonding paste with exceptional performance properties for bonding Effisus Ecofacade Membranes to all conventional building surfaces, such as concrete or metal.

Brings together on a solvent free innovative adhesive exceptional properties of adhesiveness, waterproofing and UV resistance, allowing total freedom of work. Without storage or transportation restrictions, it is the ideal option for environmental friendly projects – meeting the requirements of LEED or BREEAM certification systems – or for application on spaces with ventilation constraints.

Effisus Bonding KF+P

Effisus Bonding KF+P Adhesive:

- All advantages on a single product:
 - Adhesive
 - Waterproofing
 - UV resistant
 - Solvent free
- Superior bonding strength
- Resistant from -40°C to +160°C
- No additional mechanical fixing required
- Suitable for rough, uneven surfaces

Typical applications:

- Bonding to concrete
- Bonding to metal
- Bonding operations with low temperatures
- Bonding on moist surfaces
- Bonding of Effisus Ecofacade Membranes overlapping joints

SOLUTION ADVANTAGES

- Powerful – Superior bonding strength, waterproofing and UV resistant.
- Resistant – Resistant to movements, thermal variations and contact with moisture.
- Universal – Compatible to all conventional building surfaces (glass, concrete, aluminium, PVC, wood, etc.).
- Flexible – Complies with the different installation requirements.
- Sustainable – Solvent free. No storage or transportation restrictions.

SUPPLY INFORMATION

- 600ml foil pouch -12 units / carton
