

Effisus Bolt Protect

Installation instructions – step-by-step

- Make sure that all surfaces are properly clean and dry
- Any free material should be removed
- Any loose bolts should be tightened
- Bonding operations cannot be carried out over iced surfaces

- Apply the Effisus Futur Primer to the bolt area
- Allow the primer to dry

- Remove the protected foil from the central part
- Position the Effisus Bolt Protect over the screw, aligning it with the capsule

- Form the Effisus Bolt Protect by hand
- Press down with a silicone roller
