

SEALING INFILTRATIONS IN BOLT-HOLES

EFFISUS BOLT PROTECT

Effisus Bolt Protect

Innovative solution for sealing leaks in bolt-holes

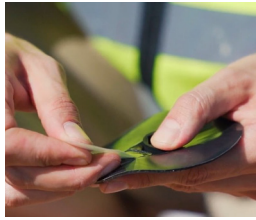

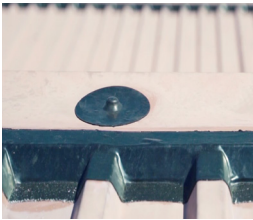

Effisus Bolt Protect is used to seal **bolt holes** in metal roofs, **preventing any water leakage**. Effisus Bolt Protect consists of an uncured circular EPDM membrane, self-adhesive multi-layer, with a pressure sensitive adhesive and a rubber capsule.

Thanks to the built-in capsule, the bolt, as well as the surrounding area, is completely protected, **ensuring a perfectly secure 100% fit**.

QUICK AND EASY INSTALLATION

EXCEPTIONAL PERFORMANCE

- 100% waterproof
- UV and moisture resistant
- No need for liquid adhesives or heat
- Absorbs structural movements
- Excellent formability to adapt to any metal panel

Universal

Flexible

100% Waterproof

Resistance

Easy to install

SUPPLIER INFORMATION

Effisus Bolt Protect – Available in diameters of 100mm and 150mm.
