EFFISUS – EFFICIENT SUSTAINABILITY

Effisus – Efficient Sustainability is part of Up-Way Systems. Up-Way Systems develops and markets Effisus Solutions worldwide. Solutions that combine in an innovative and balanced way, Efficiency, and Sustainability promoting integrated systems with high added value and superior quality.

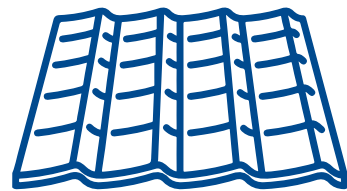

Effisus provides weatherproofing solutions for the building envelope, maximizing performance, energy efficiency, always supported by our extensive consulting services. Part of a global network with more than 8000 weatherproofing experts across the USA, Europe, Africa, and the Middle East, we aim to lead the development and commercialization of sustainable and efficient solutions for the construction industry, investing in long-term strategic partnerships with global reference partners.

OUR VISION

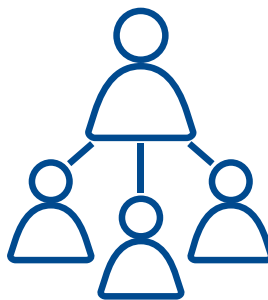

We aim to be the first option for weatherproofing solutions on every target, high-end project.

Facade Solutions

OUTPERFORMING SOLUTIONS

Effisus Outperforming Solutions are perfect for solving repetitive and critical leakage problems of every project. We aim to provide systems to **maximize the performance and efficiency** of people.

Working closely with each customer to match their needs in harmony with a long-term strategic vision, which is achievable with **Effisus superior quality integrated solutions**. Effisus promotes extremely **versatile solutions** that require a small number of accessories. The **quick and easy installation** of these materials is set to revolutionize waterproofing challenges.

We will help you identify and prevent and even repair any points of leakages in your roofs or facades.

Waterproofing Challenges

PORTFOLIO

PROJECTS

We strive to provide excellence in weatherproofing solutions for the building construction segment, with a key focus on optimizing the needs of each project. We aim to leverage strong partnerships to achieve efficiency sustainability from start to finish.

The result of such partnerships is the presence of Effisus in different countries, and its participation in globally renowned projects.

Some of our projects:

PORTUGAL | Jardins do Braço de Prata

UAE | Mobillity Pavillion Dubai
| Museum of the Future

FRANCE | Longchamp Racecourse

SPAIN | Diagonal Zero Zero

AFRICA | Madagascar Airport

For additional reference projects please visit Effisus website:

EFFISUS BOLT PROTECT

MEMBRANE

FULL ADHESION

UV RESISTENCE

DURABLE

100%
WATERPROOF

FLEXIBLE

EASY
TO INSTALL

Effisus Bolt Protect is an innovative solution for sealing and repairing bolt holes in metal roofs, preventing leaks permanently.

The high elasticity of the membrane allows it to absorb structural movements of the metal panel without any difficulty. It features a rubber capsule that ensures a perfect fit onto the bolt and the excellent elongation of the membrane adapts completely to the surrounding area.

COMPONENTS:

Bolt Protect

Coat SP Primer

EFFISUS EASYREPAIR

Effisus Easyrepair Membrane is the ideal solution for sealing leaks on roofs and facades. It creates a waterproof, moisture, and airtight barrier, with no additional sealing required.

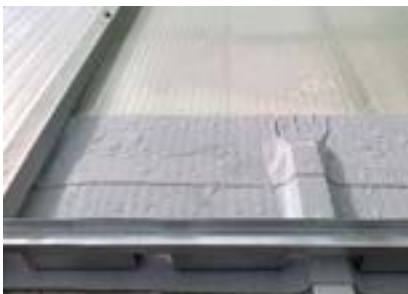

The self-adhesive membrane bonds to a wide range of surfaces including difficult roof materials such as EPDM, TPO, most PVC, Polycarbonate, Glass, Metal, Natural Stone, Concrete, Plaster or Ceramic, etc.

Effisus Easyrepair membrane is available in Black, Gray, White and paintable.

TYPICAL APPLICATIONS:

- Polycarbonate joints
- Flashings details
- Theresholds
- Clading
- Glazin joints
- Ridge cap joints
- Skylights
- Connections
- Panel joints

WATERPROOF

EASY
TO INSTALL

Effisus Bond FT is the ideal solution for permanently sealing flashing details on metal roofs of any type. Its unique elongation capacity and flexibility guarantee that it can be formed to fit irregular shapes and surfaces, with no need for mechanical fastening, torch, or extra adhesives.

Effisus Bond FT consists of an uncured self-adhesive EPDM tape that has been laminated to an EPDM-based pressure-sensitive tape adhesive.

COMPONENTS:

Bond FT

Coat SP Primer

Bonding KF+P

TYPICAL APPLICATIONS:

- Skylights
- Facades perforations
- Chimneys
- Ducts
- Flashing details
- Louver
- Joints
- Connections
- Ridge cap

EFFISUS 2BOND DS

Effisus 2Bond DS is a solution for sealing between two surfaces, of the same or different materials and sealing any kind of nail/screw penetration.

Effisus 2Bond DS is a double-adhesive tape, based on advanced technology with active sealants. This technology uses a special encapsulated primer, which is released upon pressure activation, allowing the tape to “melt” at a molecular level with the surface on which it is applied.

This guarantees excellent adhesion to the most diverse materials: polycarbonate, glass, metals, natural stone, concrete, plaster, or ceramic.

TYPICAL APPLICATIONS:

- Polycarbonate joints
- Flashings details
- Theresholds
- Cladding
- Glazin joints
- Ridge cap Joints
- Skylights
- Connections
- Panel Joints

UV RESISTENCE

EASY
TO INSTALL

Effisus Stopper is used for sealing roof penetrations of any size or shape, without the need of mechanical fixing, torch or metal flashing.

It can be used on any surface such as PVC, TPO or EPDM, granulated modified bitumen, asphalt membranes, concrete and metal.

The final solution is environmentally friendly as the sealants do not contain VOC's.

COMPONENTS:

Effisus Multishapper

Effisus M-1 Sealant

Effisus 1-P Sealant

TYPICAL APPLICATIONS:

- Crossings on flat roofs
- Irregular shaped penetrations
- Penetrations on metal roofs
- Vertical and horizontal intersections

EFFISUS STOPPER MR

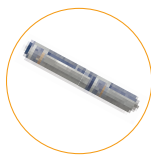

Effisus Stopper MR is a solution for the permanent sealing of circular perforations in metal roofs, with diameters from 3 to 750mm. Its laminated aluminum base allows a perfect fit to any roof profile. Its flexibility ensures absorption of roof movements or vibrations, resisting the most aggressive atmospheric conditions.

The different models available allow it to be adapted to an project requirement. Facade applications are also possible.

COMPONENTS:

Stopper MR

Bonding KF+P

Fix AZ Screws

MODELS:

- MR Retrofit
- High Temperature
- Universal
- Square

EFFISUS ALLTITEGUTTER

MEMBRANE

UNIVERSAL

ROBUST

UV RESISTENCE

DURABLE

100%
WATERPROOF

EASY
TO INSTALL

Effisus Alltitegutter is a waterproofing membrane for the repair of deteriorated gutters. It brings everlasting sealing security to the most critical parts of the roof. It is a self-adhesive EPDM waterproofing membrane scrim-reinforced with glass fiber, featuring state-of-the-art technology.

It adapts to sharp edges and any gutter dimension.

Effisus Alltitegutter is fully customizable where details are quickly solved in conjugation with the Effisus Bond FT Tape.

COMPONENTS:

Alltitegutter

Bond FT

Coat SP

Primer 9800

Bonding KF+P

COMPATIBLE MATERIALS:

- Lacquered gutter
- Galvanized gutter
- Stainless steel gutter

EFFISUS TITEGUTTER3

Effisus Titegutter3 is an integrated system for sealing gutter joints. The system is guaranteed by its three waterproofing levels, a double adhesive tape which seals the joint, protected by an EPDM membrane adhered to the surface and sealed on the edges by a sealant.

Their properties give it the capacity of accommodating joint movements originated by structural or thermal expansion. Each element plays a specific role, which interaction as a whole makes this solution unique.

COMPONENTS:

2Bond DS

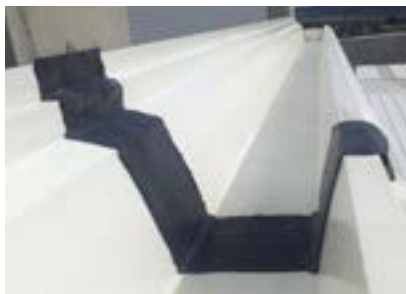

Ecofacade

Bonding KF+P

COMPATIBLE MATERIALS:

- Lacquered gutter
- Galvanized gutter
- Stainless steel gutter

CONSULTING / BESPOKE SOLUTIONS

Each project is unique.
Each intervenient is decisive.
Each phase is crucial.

The Effisus Consulting services are the ultimate added value throughout the whole process, by providing comprehensive support every step of the way, to every project intervenient with attention to every detail – **the key to complete success.**

Our unique market approach and **innovative thinking**, together with our engineering and construction experience on envelope weatherproofing systems, allows us to offer **the best solution and support to the challenges that owners, architects, contractors, engineers, and inspectors** face throughout the entire construction process, achieving:

UNBEATABLE
QUALITY

State-of-the-art
solutions

MAJOR
